61 million children around the world do not go to elementary school

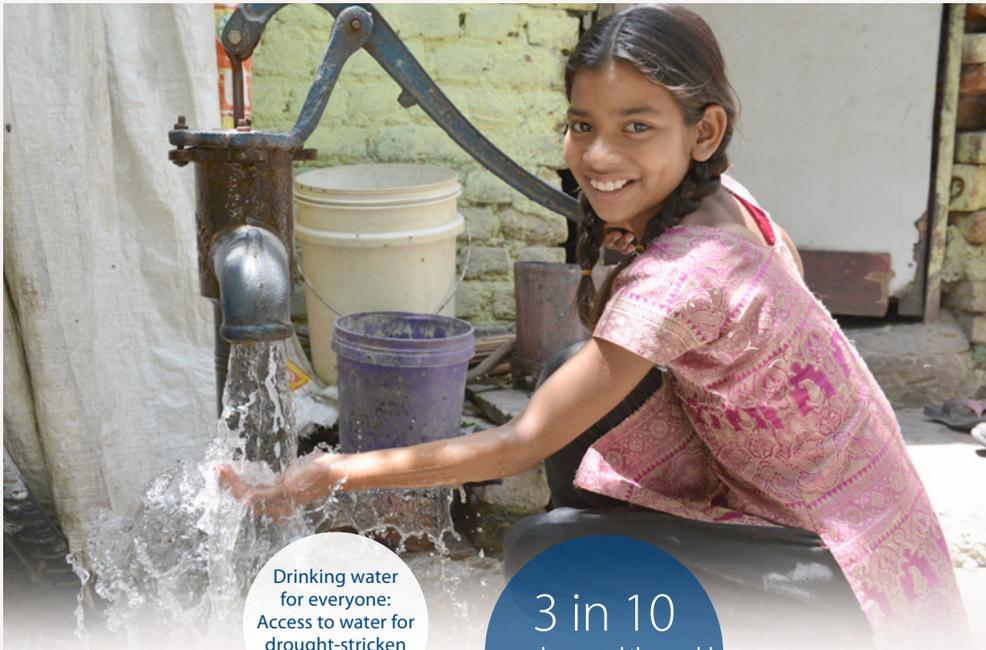

At 13%, global youth unemployment is more than twice as high as average unemployment

What drives us

Education

Access to education is a basic human right. That is why Knorr-Bremse Global Care supports projects along the entire education path. We see supporting vocational training in particular as a key to enabling young adults to live independent lives.

Drinking water
for everyone:

WASH (water, sanitation and hygiene)

Knorr-Bremse Global Care also promotes safe, affordable drinking water, adequate sanitation, improved hygiene and efficient water use. The goal is to lower child mortality, improve health and increase school attendance among girls.

What we want to achieve

Providing help and inspiring helpers: The projects supported by Knorr-Bremse Global Care pursue two main aims. To help people in need through no fault of their own to get a chance to live independent, self-determined lives – through projects that are designed to have an impact and strengthen self-reliance and personal responsibility. To do this, we support local partner organizations.

In addition, Global Care wants to draw attention to global ills and motivate people to get involved in social projects. Involving the global Knorr-Bremse sites and their employees is therefore a key aim – and an important success factor.
